

CITIMAX D Series

Make The Most of Every Journey
Faster, Lighter, Smarter and More Efficient

CITIMAX D Series

Citimax D series is the new generation of truck refrigeration unit with decades of Carrier's practice and R&D experience. More than ever, today's CITIMAX D series not only is a more powerful and reliable unit but also can provide customers a faster, lighter, smarter and more efficient usage benefit.

The New Controller—IntelliTmX Let Intelligence Be Seen

- 3.2" large screen
- Chinese/English display
- Upgraded control logic
- Data storage & download
- LYNX service as an option

More Reliable Performance

- Larger cooling & heating capacity
- Up to 22% pre-cooling speed improvement

Lighter & More Compact

- Up to 26% lighter given by a more compact design
- More loading ability & easier installation

Upgrades for Better Durability

- **12000 hours long-life fans
- Better installation quality thanks to upgraded compressor with pre-assembled fittings

Ultra-thin Evaporator

- Less impact of cargo stacking given by newly inclined-evaporator design
- Larger air flow & more loading space

More Efficient & Sustainable

- Up to 38% of less refrigerant usage
- Better efficiency & environment friendly

CITIMAX D Series

*All the above are compared with legacy Citimax.
**Data from lab test. Real service lifetime will have difference based on real usage situation.

Model	Cooling Capacity(W)		Heating Capacity(W)	Air Flow (m³/h)	Condenser Dimensions (W*H*D mm)	Evaporator Dimensions (W*H*D mm)	Weight (KG)	Refrigerant (R404A,KG)	Voltage (V)	Current (A)	Compressor Model
	0°C/+30°C	-20°C/+30°C	+18°C/-18°C
